

THINKING CRITICALLY ABOUT CODE: A COMMUNITY WORKSHOP SERIES

MLA 2026

Dez Miller, PhD Candidate,
Emory University, Department
of Comparative Literature

“THINKING CRITICALLY ABOUT CODE”

January 24

Coding for Humanists

An in-person bootcamp led by Tiago Moura (Tempus AI) ECDS, Woodruff Library, Emory University

February 21

Curating Ethical Datasets

Virtual presentations & discussion led by Erin Anderson (GSU PhD) & Salwa Hoque (Emory Postdoc)

March 28

Representing the Past

Virtual presentations & discussion led by Allie Teixeira Riggs (GT PhD) & Mohsin Yousufi (GT PhD)

April 11

Predicting the Future

Virtual Presentations led by Ololade Faniyi (Emory PhD) & Anya Martin (GT PhD)

October 2

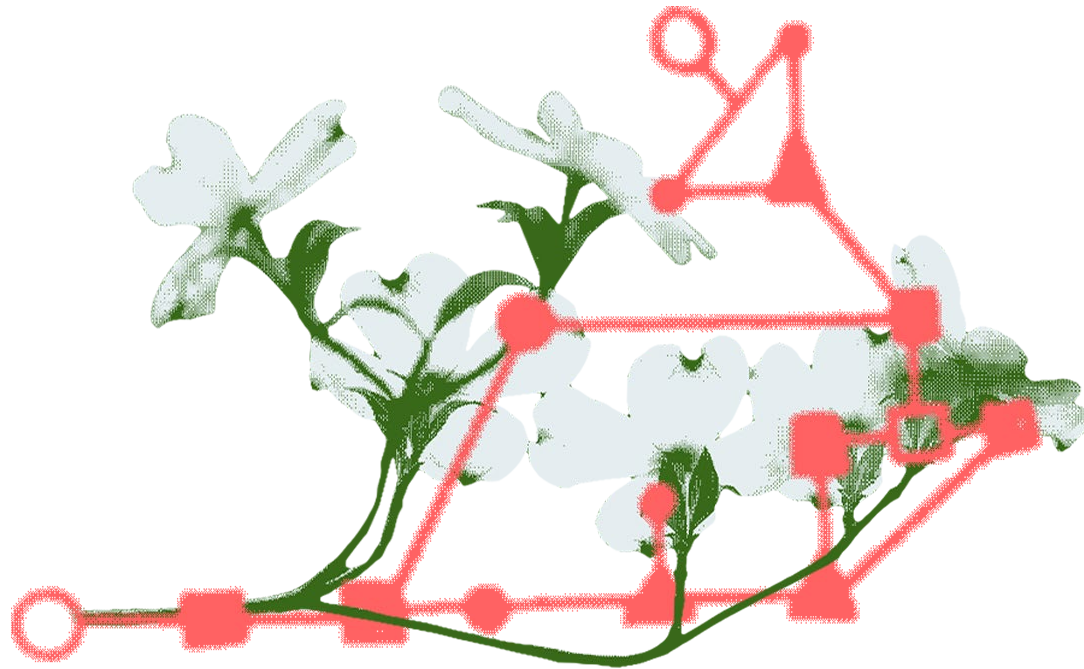

Keynote: Assistant Professor Ari Schlesinger

A hybrid keynote presentation “(Re)Programming Computing: Critical Perspectives in Human Centered Computing”

AIAI NETWORK

An intentionally interdisciplinary network of Atlanta-based researchers investigating how to enlist AI ethically, equitably, and in the service of justice.

- **Atlanta Focused:** We aim to bring the city of Atlanta, with its historical place in the civil rights movement, to current conversations about the biases embedded in our AI systems.
- **Humanities Forward:** We believe that an equitable, ethical, and justice-oriented approach to AI is possible when humanistic ways of thinking come together with technical knowledge and community expertise.

WORKSHOP 1: CURATING ETHICAL DATASETS

SPONSORED BY THE
ATLANTA
INTERDISCIPLINARY
AI NETWORK

Curating Ethical Datasets

Workshop

How can we address systemic
bias in our data work?

Join interdisciplinary ATL
scholars to discuss methods
and possibilities.

featuring:

"Databases: Biases of Data and
Thinking Beyond Inclusion-
Exclusion," by **Salwa Hoque**
(Emory Postdoc)

"Title: Mixed-reality (MR) teaching
simulations," by **Erin Anderson**
(GSU PhD)

Friday, February 21
10:00am - 11:30am
via Zoom

learn more, find advance
materials, & sign up for
updates at
atldh.wordpress.com

This workshop is part of "Thinking Critically
About Code: A Community Workshop Series."

WORKSHOP 2: REPRESENTING THE PAST

 SPONSORED BY THE
ATLANTA
INTERDISCIPLINARY
AI NETWORK

Representing the Past Workshop

How can we capture history and
human life without reducing it
to something solely
quantitative?

Join interdisciplinary ATL scholars
to discuss methods and
possibilities.

featuring

"Generating Queer Histories: Prompting
Critical Reflections on Generative AI in the
Archives," by **Allie Teixeira Riggs (GT PhD)**

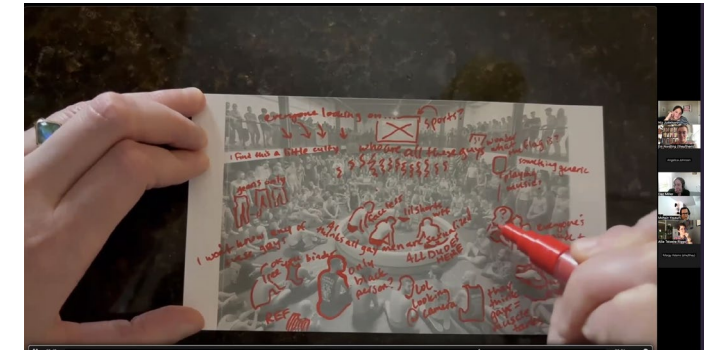

"The Unmappable Atlas: Reclaiming Space
from AI's Gaze," by **Mohsin Yousufi (GT
PhD)**

Friday, March 28
10:00am - 11:30am
via [Zoom](#)

learn more, find advance
materials, & sign up for

This workshop is part of "Thinking Critically
About Code: A Community Workshop Series."

WORKSHOP 3: PREDICTING THE FUTURE

SPONSORED BY THE
ATLANTA
INTERDISCIPLINARY
AI NETWORK

Predicting the Future Workshop

What new methods, tools, or
practices can we use to help
mitigate the potential future
harms of algorithmic data?

Join interdisciplinary ATL scholars
to discuss methods and
possibilities.

featuring

"Digital Colonialism and Afro-Feminist
Futures," by **Ololade Faniyi (Emory PhD)**

"AI Climate Modeling in an Age of Runaway
Climate Change," by **Anya Martin (GT PhD)**

Friday, April 11
10:00am - 11:30am
via **Zoom**

learn more, find advance
materials, & sign up for
updates at
atldh.wordpress.com

This workshop is part of "Thinking Critically
About Code: A Community Workshop Series."

BRIDGING THE DIGITAL DIVIDE

- 01 the working conditions and technological resistance of former content moderators (tech workers) in Africa
- 02 who controls internet infrastructure like undersea cables and surveillance systems
- 03 minimal responsibility for the consequences of platform governance decisions
- 04 who benefits and who bears the cost of technological progress who is human in techno-utopian "technological supermen narratives"

KEYNOTE: RE(PROGRAMMING) COMPUTING: CRITICAL PERSPECTIVES IN (HUMAN-CENTERED) COMPUTING

DR. ARI SCHLESINGER

(Re)Programming Computing: Critical Perspectives in (Human-Centered) Computing

What would the world be like if all computer scientists had to think critically with, and through code?
